Inline math $a^2 + b^2 = c^2$ and $\frac{1}{2}\sum_{i=1}^{n} x_i$.

$$\int_0^\infty e^{-x^2}\,dx = \frac{\sqrt{\pi}}{2} \tag{1}$$

By (**??**) we have

$$\begin{pmatrix} a & b \\ c & d \end{pmatrix} \cdot \sqrt[3]{x+y}$$

and

$$\begin{aligned} x &= y + z && (2) \\ y &\leq \alpha\beta\gamma \\ \lim_{n\to\infty} \frac{1}{n} &= 0 && (3) \end{aligned}$$

$$f(x) = \begin{cases} 0 & \text{if } x < 0 \\ 1 & \text{otherwise} \end{cases}$$
